SECTION I.

INTRODUCTION.

The purpose of this Technical Report is to review the Revised Draft Software Design Document, CDRL A006-02, which was produced for the Government by Evaluation Research Corporation. The results are provided in the form of Data Item Discrepancy worksheets as requested by the CMOS Program Office.

SUMMARY. Not Used.

CONCLUSION. Not Used.

Keyword: Cargo Handling, (KR)

COMMENT OR RECOMMENDED CHANGE:

Comply with intent of DID. Current information does not adequately address the requirements of this directive.

RATIONALE:

Paragraph 10.1.9 requires that traceability of requirements be "allocated to the CSU level of each CSC". The text, as written, mentions only the CSC level. In addition, the specific appendix of the RTM, which provides this traceability, should be referenced.

PAGE NUMBER: 13

PARA NUMBER: 3.1.1

COMMENT OR RECOMMENDED CHANGE:

Change the last paragraph of this section so that NDS elements used by the software are identified as being incorporated into the CSCI. A description of these NDS elements incorporated into the CMOS design should also be present in section 4.

RATIONALE:

The last paragraph of this section states that there are several NDS routines that are "invoked" by the CSCI, but that none are incorporated into the CSCI. A routine that is invoked by the CSCI has, in fact, been incorporated into the architecture of the CSCI. This is especially true in the case of the UNIX "cron" feature, which is integral to many of the functions of this CSCI, as evidenced by the numerous references to it in paragraph 3.2, and as described by the development contractor in the Preliminary Design Review briefing.

Move the last paragraph in this section, (the one immediately before paragraph 3.1.2), so that it appears before the subordinate paragraphs (3.1.1.1 and 3.1.1.2) of this section.

RATIONALE:

The paragraph contains information which relates to the CSCI architecture as a whole, and its current position makes it appear as though it is a part of paragraph 3.1.1.2 only.
